Jin Suk Byun

President of the Korean Society for Aesthetic Plastic Surgery

Dear Members of Korean Society for Aesthetic Plastic Surgery;

The calendar says it is spring, but the weather these days remains on the brink of winter. Spring does not feel like spring these days. At a time when the shadow of recession is still hovering over us, I would like to convey my words of sincere encouragement to you, the members who have tried to overcome the crisis in aesthetic plastic surgery.

I understand that the environments surrounding us are really challenging and difficult to be improved with ease. However, if all the members devote themselves to the development of new techniques, the profound academic growth of the Society, and the efforts to further the substance, we will gain the strength to overcome any difficult situations.

It has been three years since the Congress, which used to remain at the national level, was reorganized to be an international one on the back of its merger with the Korean Association of Plastic Surgeons (KSPS). It has been a short time of period, but we were able to proudly introduce the advances in Korea's aesthetic plastic surgery to the world and generate visible academic results.

This year the Congress of Korean Society for Aesthetic Plastic Surgery will take place at KOEX, Seoul under the title of **"Aesthetic Plastic Surgery 2013"** on April 26~27 in conjunction with the Korean Association of Plastic Surgeons. The three-day duration has been shortened to two days this year to cut down overlapping topics and concentrate on important topics. Efforts have also been made to invite new speakers at the Congress. We have also moved the Congress to the weekends so that more members will be able to participate. I would like to express my deepest gratitude to the Chief Director, Society Members, and Management & Employees, who made detailed preparations for the success of the Congress, for their volunteering works and hard efforts.

As the Chairman of the Society, I once again hope that your works will go along to your satisfaction and look forward to welcoming all of you at the Congress.

Thank you.

Welcome Message - Chairman, Board of Directors (KSAPS)

Young Jin Kim

Chairman, Board of Directors of
the Korean Society for Aesthetic Plastic Surgery

Dear members and foreign plastic surgeons in great interest of Korea's aesthetic plastic surgery.

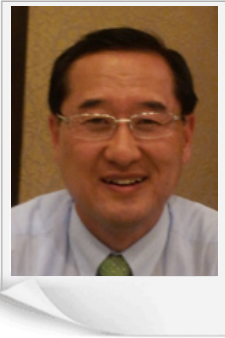

It is our pleasure to invite you to the International Meeting of the Korean Society for Aesthetic Plastic Surgery(31st), the Korean Association of Plastic Surgeons(11th) and ***International Aesthetic Expo 2013***, which will be held in COEX convention center, Seoul, from 27 to 28 April 2013.

Since the foundation of Korean Society for Aesthetic Plastic Surgery, great improvements in terms of both quality and quantity have been achieved by our honorable members. Furthermore, we brought in the International Aesthetic Expo, a festival which our members and also the public can participate in, for the second time. It is time for us to ensure internal stability by establishing a firm foothold from our past experiences. By this international meeting and expo, our goal is to let all the people know the leading role of plastic surgeons in aesthetic surgery, and also, expanding a global footprint and a global reputation of Korea's aesthetic plastic surgery.

Recently, many similar symposiums are held, we tried to provide differentiated programs and various lectures to avoid overlapping.

We are looking forward to your visit.

Thank you.

Sang Mock Lee

President of the Korean Association of Plastic Surgeons

The year, 2012, we had many issues in economic, political, cultural field in whole around world. But, through the development of our scientific and sociological idea for the life, the whole around people could have more common senses than before. One problem in one country is not confined to that area, but it could have big issue in other many countries. Now we live in one-world, not each country. There is also a movement, 'fusion' between fields because many fields those we thought different in nature have common knowledge or common problems.

I proudly present you our 1st installment of '**Aesthetic Plastic Surgery 2013**' in Seoul. This annual scientific meeting is usually co-endorsed by the congress of the Korean society for aesthetic plastic surgeons and by the congress of the Korean association of plastic surgeons. It is very well-known to the Korean and some Asian plastic surgeons as very high-ended scientific meeting, but it is not introduced to the plastic surgeons in whole world even we have relatively long history. Our committee found it causes by it don't have its representative naming for this annual scientific meeting. From 2013, we will hold this scientific meeting in different name "**Aesthetic Plastic Surgery 2013**". Form now-on, we want to re-start our new era with new title "Aesthetic Plastic Surgery 2013' in Korea.

It is not only changing the name of this meeting, but also changing in quality in scientific field. Our committee invites many excellent panelists from Korea and other many countries for more well updated scientific knowledge. We also changed our Journal published in English to be a status as one of the world-class societies.

I would like to invite you to join "**Aesthetic Plastic Surgery 2013**". In this meeting, you can find a parade of many excellent presentations on outstanding academic achievements across many different fields from eye or nose surgery to breast and body surgery, minimal invasive surgery including botulinum toxin and fillers, ADSC assisted surgery and others with the latest development. There is no doubt that this level of advanced development would not have been possible without the ongoing effort of each member and the solid exchanges and cooperation among the members. Through this meeting, you can have up-dated academic exchanges and world-wide networking in your practice.

I hope see more members from whole world in this meeting and I wish for health and peace in your family.

Welcome Message - Chairman, Scientific Committee (KSAPS)

Seung Kyu Han

Chairman, Scientific Committee of
the Korean Society for Aesthetic Plastic Surgery

Dear Friends and Colleagues,

I am particularly pleased to announce you that ***Aesthetic Plastic Surgery 2013***, the international meeting on aesthetic plastic surgery, is successfully prepared. The Korean Society for Aesthetic Plastic Surgery has recently started to hold an academic conference, whose status has been raised to an international one, in conjunction with the Korean Association of Plastic Surgeons. From this year, the title of the conference was changed to ***"Aesthetic Plastic Surgery 2013"*** to claim its highest authority in the field of aesthetic plastic surgery and a new homepage was opened.

I'd like to say that we did our best to prepare the 2013 Conference. Let me describe some of the characteristics of ***"Aesthetic Plastic Surgery 2013"*** first to be held after the title change: First, the program includes non-cosmetic aesthetic procedures in addition to cosmetic ones, reinforces the topics on new treatments based on basic research such as cell therapy, and highlights its differentiation from the conferences held by non-specialists. Second, we expands the topics that received great responses from the members and shrinks the sessions that received weak responses based on the survey results on the 2012 conference in order to increase the overall vitality level of the conference. Third, the program was organized with a focus on the participating members rather than the holding institution. In other words, we have put the sessions of the same field in the same room so that the participating members could enjoy convenience when studying at the conference. Based on our experiences with the previous conferences, we have also allocated topics with many participants to two rooms combined into one so that the participating members would experience inconvenience of standing in the sessions at the minimum level. Finally, we will install and run an electronic board near the reception desk so that the members will be able to watch a poster presentation in an easy and comfortable way.

I wish for the successful ***"Aesthetic Plastic Surgery 2013."***

Thank you.

Jae Woo Park

Chairman, Scientific Committee of
the Korean Association of Plastic Surgeons

Board member of science, the Congress of the Korean Association of Plastic Surgeons.

Many people usually think the cosmetic or aesthetic surgery is the more superficial, light-weighted surgery than Plastic surgery. But I think it is odd, not sound. Because the word "cosmos" from "kosmos" that means "order" have most unimaginable depth. The word aesthetic from the "aisthetikos", means "I feel, sense", "sensitive", and "beauty". Aesthetics is a branch of philosophy dealing with the nature of art, beauty, and culture, with the creation and appreciation of beauty. It also has the meaning of "cosmetic" in it. Plato said that aesthetic objects incorporated proportion, harmony, and unity among their parts. Aristotle found that the universal elements of beauty were order, symmetry, and definiteness. It is not confined to the Greek-Rome or western philosophy. These concepts have been all round world including Asia, India, Islam, Africa during the whole history in our human being. The goal of the cosmetic, aesthetic surgery is to help restore order of the patient's external appearance and finally make their life beauty in order and in proportion. Sometimes the disfigurement of someone make them to feel out of alignment and sad. If we restore their external appearance in order, it could restore their life in sound body, in sound mind, and in sound sprite. Sometimes we often think the cosmetic surgery is not related with reconstructive surgery, but I think it is always based on the basic idea of the reconstructive surgery. Nowadays, everything in our life usually be in the 'fusion' between different parts as a trend. It is time to make connections with other related fields to make further advancements in our activities. That is the reason why we have changed the name of our scientific meeting as '**Aesthetic Plastic Surgery 2013**'. We would deal the new trends in cosmetic and aesthetic surgery that is very legitimate and get better results in external appearances and functional recovery. You can find the way to restore the people in harmony and in order, not only in the appearance but also in the spirit.

I would like to share this wonderful meeting with the members from many countries. We want to have academic exchanges with other countries' members to promote growth and development on both sides. With this communication between world-wide members, we can get our improvement in scientific knowledge and in our friendship.

Thank you very much.

4. Curriculum Vitae

Giovanni Botti, M.D., comes from Salò, Lake Garda, Italy and is the head manager and the main surgeon of Villa Bella Clinic, one of the best equipped and most advanced cosmetic-surgery-dedicated day surgery units in Europe. He took part as faculty member to very many aesthetic surgery courses and congresses, organized by both Universities and Scientific Societies in more than 30 different countries. He also performed demonstrative surgical operations in various hospitals worldwide. He is the author of four complete books: "Liposuzione ambulatoriale" (1988), "Chirurgia estetica dell' invecchiamento facciale" ("Aesthetic surgery of the aging face"-1995), "Mastoplastiche estetiche ("Aesthetic mammoplasties"-2004), "Chirurgia plastica estetica del midface e del collo" ("Midface and neck aesthetic plastic surgery"- 2010), translated in English and Spanish, and wrote chapters of several textbooks together with 71 scientific articles published by the most well-known international medical reviews. Dr Botti was awarded for his contributions to the improvement of Aesthetic surgery by the American Academy of Cosmetic Surgery (Philadelphia, 1990), by the Japanese Society of Aesthetic Plastic Surgery (Tokyo, 2000), by the Aegyptian Society of Plastic and Reconstructive Surgery (Cairo, 2001), by IMCAS, (Paris 2003, 2004, 2005 e 2006, 2009), by the Romanian Society of Aesthetic, Plastic and Reconstructive Surgery (Sinaia, 2006), by the Moldavian Society of Aesthetic Surgery (2007) and by the Australasian Society of Aesthetic Plastic Surgery (2010). After having taught several years at the post-graduate aesthetic surgery class of Pavia University and at the aesthetic surgery Master courses of Milan University, now he is clinical professor of Plastic Surgery at the Verona University and teacher of Aesthetic Surgery at the Siena University. He is also a teacher in the Master Courses of Aesthetic Surgery of the Padua University, of the Rome University, of the Genoa University, of the Wien University, and is the director of the annual Course "Vesalius" on facial plastic surgery of the Bruxelles University and of the Course on aesthetic plastic surgery of Villa Bella Clinic. He is honorary member of the French Society of Aesthetic Surgery, of the Aegyptian Society of Plastic, Reconstructive and Aesthetic Surgery, of the Romanian Society of Aesthetic Plastic Surgery, of the Moldavian Society of Aesthetic Plastic Surgery, of the Serbian Society of Plastic, Reconstructive and Aesthetic Surgery and of the Australian Society of Aesthetic Plastic Surgery. He is President of the Italian Society of Aesthetic Plastic Surgery (AICPE) and an active member of various national and international societies (AICPE, SICPRE, ISAPS, EAFPS, ISLAS, IPRAS etc). And, perhaps even more important, he loves his job!

Presentation Information

◆ Lecture Presentation Guideline

1. The symposium only takes computer presentation through Power Point.
2. A monitor and a mouse will be placed in the podium for the symposium
 - 1) You can use the mouse icon in stead of laser pointer.
 - 2) As presenting the lecture, you can face both the monitor and audience.
 - 3) Please notify staffs beforehand if a laser pointer is needed.
3. All submitted lecture slides will be deleted after the symposium.

◆ Presentation Guideline

1. It is a recommendation to add a simple introduction and conclusion to main content in the lecture. But too much of history and well-known background introduction is better to be omitted.
2. It is desired to present objective information and data with appropriate introduction.
3. An attempt to present excessive graphs and tables in a short time can lead to downgrade the quality of lecture.
4. Exceeding assigned time cannot be tolerated in any circumstances. This is a huge discourtesy to moderators, audience and other speakers. Please practice presentation in advance and measure the length of time. (Microphone will be turned off if the assigned time is over.)
5. Please distribute sufficient time for the audience to understand when a lecture slide is passed on to the next. It will be helpful to add an introduction of main point when observing graphs or photographs.
6. It is suggested to carry under 8 lines of sentences or 2 or less graphics or photographs in a slide. Please enlarge the font into the suitable size.
